## ARREST DOESN'T WORRY HOWATT

President of District No. 1 Declares Court Action Will Not Affect Strike.

Pittsburg, Kan., Dec. 4.—(L. N. S.)

Alexander Howatt, president of district No. 1, United Mine Workers of America, comprising the Kansas fields, is not letting a little thing like an arrest for contempt of court worry him. The arrest of Howatt and other district officials is scheduled for today. Howatt in statement said:

"The fact that Secretary Thomas Harvey, national board member; George L. Peck and myself are to be arrested within a few days will have absolutely no effect upon the strike situation. The miners know how to strike, and if all of their officers are placed in prison they can keep right on striking."

"The United Mine Workers still expect the United States government to be big enough to make good the proposition of Secretary of Labor Wilson to give the miners a 31 per cent wage increase. The proposition was accepted by the miners and they expect the government to carry it out, although Dr. Garfield has repudiated it."

The guardsmen and volunteers are trying to see who can get in the line first. Each group is vying with the other in "stunts" that enliven the monotony of camp life and mine work."

The volunteers are working in groups. Athletic groups, fraternity groups and college groups are found, each generally in his own particular section or pit. One of the best known leaders of the athletic bunch is Allen P. Dale, of Lawrence, Kan., a former Carlisle and Haskell Indian school football star, is also the last chief of the Omaha tribe. He saw "heap much" service in France. Then there is E. C. Whitehead, former air service instructor in France, leading his engineer bunch at work. Athletic stars and ex-service men are found galore.

Company A, of the Fourth Kansas guard, however, has the volunteers guessing. They have equipped their tents with electric lights, following the complaint of one guardsman the other night that he "couldn't find his blanket." They're working in the "Wilson" pit, too.
